BALA

PREVENTING ARC FLASH INCIDENTS BY DESIGN

Bruce Young authored this cover story on preventing arc flash incidents for the Winter 2012 edition of Pure Power, a supplement to Consulting Specifying Engineer Magazine, published in December 2012.

An Electrical Engineer for over 25 years, Bruce is aware of at least 15 arc flash incidents and was directly involved in 3 of them. This article presents an overview of arc flash, an analysis of hazard levels, the importance of appropriate labeling and strategies to reduce the risk of an arc flash incident.
