### STRUCTURAL EXPERIENCE

Over our 30-year history, Bala has created a competitive advantage in unifying structural engineering with other engineering disciplines, under one roof, providing a "one-stop shopping" experience for our clients. Utilizing state-of-the-art software, such as REVIT, RAM and RISA, our award winning engineers create and document structures that are safe, efficient, and constructible. Bala's team has an impressive resume of high profile projects that span various industries including: corporate office buildings, healthcare facilities, municipal buildings, residential structures, religious institutions, parking structures, educational facilities, warehouse facilities, pharmaceutical manufacturing and laboratories.

### PROJECT TYPES

New Buildings (single story/high-rise)	Renovations & Adaptive Re-Use
Steel, Concrete, Masonry & Timber Structures	Post Tension Concrete Framing
Deep Foundation Systems	Wind/Seismic Lateral Load Resisting Systems
Tilt-up Concrete & Steel Joist Systems	Girder-Slab Structures
Architectural Exposed Structures	Industrial Platforms, Overhead Cranes, Equipment Pads
