- Seaside Assisted Living
- The Evergreens
- The Hill at Whitemarsh
- Whites Heritage Continuing Care Retirement Community
- Woodland Heights

LIFECARE EXPERIENCE

Engineering systems for continuing care retirement communities requires an expansive knowledge of applicable codes and systems due to the diverse nature of these facilities. These communities have occupancies which range from independent living to skilled nursing and each has its unique requirements for occupant comfort and safety. In addition, the expectations of current and potential future residents far exceed the dormitory type facilities which were common decades ago. Bala has become one of the leading engineering firms for life care facilities. Typical engineering approaches for CCRC's must meet the challenge of designing large energy efficient systems while at the same time avoiding an institutional feel.

PROJECT TYPES

Skilled Nursing	Residential Healthcare
Assisted Living	Community Centers
Independent Living Residences	Medical Exam Rooms
Rehabilitation Facilities	Campus Infrastructure
